

Action Report for Feedback from the Parents of the Students for Session 2020-21

As per the information received from the Feed Back form given by the parents of the students, it is inferred that majority of the parents feel satisfied by the teaching imparted to their wards by all the teachers of the Department. Most of the parents have given the ranking in most of the queries as **Excellent** and **Very Good**. The response of the parents seems to be on the positive side which shows the faith in the Department, in the University and overall responsibility taken by the Department of Statistics for nurturing the career path of the students. Even during this time of Covid when mode of On-line teaching was followed, no major negative response is shown in any aspect directly related to the students. Some small issues pertaining to extracurricular activities / sports and the placement of the students need special attention of the Department and the Department is making continuous efforts in this direction. Hopefully as and when the Department is fully functional in the physical mode, all these issues will be sorted out. The Department of Statistics constantly tries to improve the teaching methodology by giving many examples and exposing students to the latest statistical tools for solving practical problems
